

**Peterborough County/City Waste Management Facility**

**Soil Acceptance Application Form**

The Peterborough County/City Waste Management Facility accepts contaminated soils for daily cover or disposal, only after the results of lab analysis of the soil have been approved by City Staff. This soil acceptance application form is required to initiate the review process.

Please complete this application form and forward it along with supporting documents to:

**Section D – Chemical Acceptance Criteria**

Appropriate Report of Analysis must be submitted with this application form along with site and sample location plans. Chemical analysis must be sufficient in quantity and scope to represent all the material to be disposed of and all of the suspected contaminants. Analysis and criteria should be listed side by side, and any parameters in excess of the guidelines highlighted.

**1. For Use as Daily Cover: (\$20/tonne as per Waste Management By-law 07-027)**

- Any material that is not liquid industrial or hazardous and complies with the requirements specified in Regulation 347/558 Schedule 4 TCLP - Leachate Criteria AND,
- Any material with results of chemical analysis that comply with “Subsurface Soil Criteria for Industrial/Commercial Land Use for a Non-potable Groundwater Condition” Table D, in Guideline for Use at Contaminated Sites in Ontario (MOE Revised 1997) (See Attachment 1).

**2. For Disposal as Waste: (\$85/tonne as per Waste Management By-law 07-027)**

- Any material that is not liquid industrial or hazardous and complies with the requirements specified in Regulation 347/558 Schedule 4 TCLP – Leachate Criteria. (See Attachment 2).

**Intended Use of Contaminated Material:**

1. Daily Cover

2. Waste

**DISCLAIMER:** The City of Peterborough reserves the right to reject any application/load (even if the soil criteria are met) in order to protect leachate quality, address landfill capacity concerns, to comply with Certificate of Approval limitations and other regulations, etc.

- ( ) Criterion value in brackets applies to medium and fine textured soils.  
 \* Criterion value is the same as the corresponding criterion in Table B.  
 \*\* Criterion value is the same as the corresponding medium/fine textured soil criterion in Table B.  
 + Boron soil criterion based on hot water extract.  
 a Soil criterion adopted from Table C (potable groundwater situation) to account for degradation to vinyl chloride.  
 ++ Analysis for methyl mercury is only required when the total mercury criterion is exceeded.  
 (\*1-) 2-methyl naphthalene soil criterion is applicable to 1-methyl naphthalene with the provision that if both are present in the soil, the sum of the two concentrations cannot exceed the soil criterion.  
 N/A = Not applicable; N/V = No value.

Notes to Schedule 4:

<sup>1</sup> CAS Number means the Chemical Abstracts Service Registry Number. When the waste or a regulated constituent is described as a combination of a chemical with its salts or esters, the CAS number is given for the parent compound only.

<sup>2</sup> Haz. Waste Number means Hazardous Waste Number. These numbers are consistent with United States Environmental Protection Agency Hazardous Waste Numbers. If there is no United States Environmental Protection Agency Hazardous Waste Number for a waste, the Hazardous Waste Number is assigned to the waste by the Ontario Ministry of the Environment.

<sup>3</sup> Toxic Equivalent (TEQ)
