

Peterborough Fire Department

Media Release

FOR IMMEDIATE RELEASE

March 9 2008
Peterborough, ON

The Peterborough Fire Department urgently requests your assistance in informing the public of the need to ensure their exhaust vents and air intakes for appliances are free of snow. We have had numerous incidents of snow drifting and blowing in between houses and covering or blocking the openings. This has caused Carbon Monoxide to back up to dangerous levels within the structure. Due to the excessive snowfall we would also appreciate people ensuring the visibility and clearance of hydrants by removing the snow around them.
