

City of Peterborough Media Release

FOR IMMEDIATE RELEASE

Monday, December 15, 2008
Peterborough, ON --

The City of Peterborough is currently experiencing water pooling on some road surfaces due to recent rainfall and the melting snow. Given the drop in temperature that is forecast for this afternoon, there is potential for freezing to occur causing localized flooding.

Public Works crews are working to clear catch basins and improve street drainage.

Citizens who can safely clear the catch basins in front of their homes are encouraged to do so in order to minimize the risk of icing. Caution is advised and citizens are asked to use care.

This information is also available on our City of Peterborough website at www.peterborough.ca.
