## Media Release

### FOR IMMEDIATE RELEASE

April 9, 2009  
Peterborough, ON --

### PRHC ROAD NETWORK IMPROVEMENTS

The City of Peterborough has initiated the detailed design of the PRHC Road Network Improvements in accordance with the Environmental Study Report dated June 2007. The City has retained the services of D.M. Wills Associates to complete the detailed design and tender preparation for construction of the improvements, which are scheduled for 2010.

The City, through its consultant D.M. Wills Associates, will be proceeding with field investigations to facilitate design starting on Tuesday, April 14, 2009. The investigations will involve the drilling of boreholes along the proposed route of the new access road between Parkhill Road and Clonsilla Avenue. The purpose of the boreholes is to obtain soil samples and to monitor groundwater levels for pavement and storm sewer designs.

As the design proceeds, the City will be organizing Public Information Centres to share details of the new road design with the public. Public Information Centres will be advertised in advance.

This information is also available on our City of Peterborough website at [www.peterborough.ca](http://www.peterborough.ca).
