Peterborough, ON

### **Working smoke alarms are essential in seasonal homes and recreational vehicles**

During the past two weeks, two men have died in separate trailer fires in Ontario. It has been confirmed by Office of the Fire Marshal investigators that no working smoke alarms were recovered from either trailer. Fires in these types of seasonal homes can spread incredibly fast.

As a result of these tragic fatal fires, Peterborough Fire Services is reminding everyone that it is the law to have a working smoke alarm in their trailer home, motor home and other recreational vehicle. In addition to smoke alarms, homes, vehicles or boats used for sleeping should be equipped with a carbon monoxide alarm.

The Ontario Fire Code requires every 'dwelling unit' in Ontario to have working smoke alarms on every storey and outside all sleeping areas," explained Fire Chief Trent Gervais. "What many people may not know is that the term 'dwelling unit' includes seasonal homes such as park model trailers, cabins and cottages and may include trailer homes, motor homes and other recreational vehicles".

While many new trailer and RV models may already meet the construction standard requiring working smoke alarms, older models may not be equipped or the smoke alarms may not be properly maintained. Smoke alarms should be tested before sleeping in any of these seasonal homes and then monthly and after any absence of more than a few days. Replace any smoke alarms that are more than 10 years old.

"Smoke alarms can alert you and give you and your family the precious time needed to safely escape a fire," said Fire Chief Trent Gervais. "Install smoke and carbon monoxide alarms in any structure where people may be sleeping or living."

Failure to comply with the applicable Fire Code smoke alarm requirements can result in a ticket for \$235 or a fine of up to \$100,000.
