Peterborough, ON --

Aerial Truck Reveal

Community members are invited to join us as Local Dignitaries and Peterborough Fire Services unveil the new Aerial at Fairhaven Long Term Care Facility, 881 Dutton Rd, Peterborough **November 28, 2011 at 11:00 am.**

Equipped with a combination telescopic and articulating boom, the **Rosenbauer T-Rex** is the fastest and most powerful articulating platform in the industry. Its on-board Can-bus electronic system provides the speed to allow firefighters to set the stabilizers, raise the aerial 115' in the air and rotate 90 degrees in less than 95 seconds!

Articulating aerial platforms provide a stable safe work area for firefighters to work and still be harnessed to the platform in case of a roof collapse. The platform is designed to accommodate a special stretcher and is wheelchair accessible, increasing our level of service to our Community's most vulnerable members.

This truck is intended to be in service as a front line aerial for the next twenty years followed by another ten years as a stand-by aerial for the Peterborough Fire Services.

This information is also available on the City of Peterborough website at www.peterborough.ca.
