

Built For Zero Report Card

FEBRUARY 2021

BUILT FOR ZERO.
PTBO

Built for Zero Canada is an ambitious national change effort to end homelessness, one community at a time. **Built for Zero Peterborough (BFZ-Ptbo)** is a group of local organizations committed to ending chronic homelessness by December 31st, 2025.

Each month **BFZ-Ptbo** will share information about the number of people experiencing homelessness in our community. We hope that sharing this information will promote transparency and accountability in our homelessness response.

By taking a close look at the data each month, we can start to:

- Focus on the facts (what we know), rather than the narrative (what we think)
- Adjust our services based on current events
- See what needs to be done to end homelessness
- Improve the lives of people experiencing homelessness

At least

247

people were experiencing homelessness in Peterborough City and County in February.

As part of our efforts to end chronic homelessness, we study changes in our chronically homeless population each month.

In February, there were 4 fewer people experiencing chronic homelessness than in January.

Of those,

107

people had been chronically homeless for six months or more in the last year.

WHAT HAS CHANGED

Inflow – People Added to our Chronic Homelessness Number

9

People became chronically homeless. Some have been in our system before and some we met for the first time.

10

People got back in touch after having not been heard from in 90 days or more. Some returned to town, or met the definition of chronically homeless again.

1

Person lost their housing. They have been in our homelessness system before, secured housing, and then lost that housing.

Outflow – People Removed from our Chronic Homelessness Number

10

People moved into housing.

These people moved into housing (rental units, living with family, long term care, etc.).

14

People lost touch.

These people have not been heard from in 90 days or more, have left town, no longer meet the definition of chronic homelessness, or have died. People who no longer meet the definition of chronic homelessness are still captured in our overall number if they are still homeless.

**BUILT
FOR
ZERO.**
PTBO

WHAT THE DATA IS SAYING ABOUT CHRONIC HOMELESSNESS IN FEBRUARY:

9

people became chronically homeless. This is the lowest number since Sept. 2020.

This is an opportunity to ask “what are we doing that could be decreasing the length of time people are homeless?”

1

person lost their housing. This is the lowest number since Oct. 2020.

This is an opportunity to ask “how can we continue to support people in maintaining their housing?”

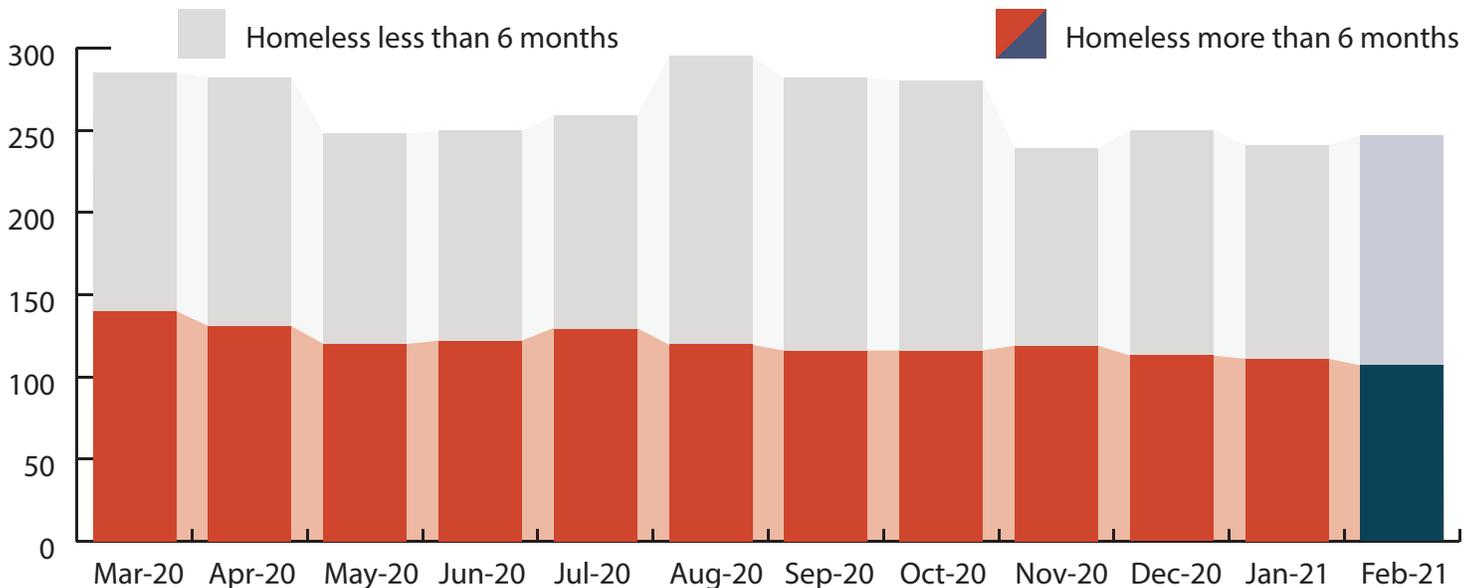

NOTES ABOUT HOMELESSNESS IN 2020

In February and November 2020, we made efforts to improve our data by conducting a review of all information. This resulted in changes and improved data that is more up-to-date. COVID-19 restrictions were put in place in our shelter system in March 2020 that decreased shelter capacity.

The total number of people experiencing homelessness was 22% less in December 2020 than it was in January 2020.

In 2020, there were 450 shifts from homelessness to housing (38% of these shifts were from chronic homelessness).
