Curtis Creek Culverts under Tivey Street and Euclid Avenue

• **Need for Improvements**
  • Culverts are in need of replacement to increase capacity, and operational improvements.
  • Reduction of future flood impacts throughout East City.

• **Curtis Creek Flood Reduction Master Plan**
  • Confirms that the two locations need the culverts replaced and upsized
  • The new culverts will provide sufficient capacity to adequately convey the regional storm event.
  • Please visit the City’s website for the full master plan report.

• **Concept Plan**
  • Includes one single 3.3m x 1.8m culvert at the Tivey St. location and two 3m wide culverts at Euclid Avenue location
  • Urbanization with storm sewers and concrete curb & gutter on all of Tivey Street and a portion of Euclid Avenue
  • Re-routing a section of sanitary sewer from Rogers Street down Tivey Street to tie into the Sanitary trunk sewer along the Greenway Rotary Trail
  • Road reconstruction and sidewalks at both locations
Curtis Creek Culvert Replacements

Schedule

Utility Relocations – scheduled for Spring/Summer 2019

Construction Start - Tentative construction start date of July 16, 2019

Tivey Street and Rogers Street

Stage 1 – Tivey Street will be closed from July 2, 2019 to Fall of 2019
Stage 2 – Rogers Street will be closed to through traffic from November 1, 2019 to Spring 2020.

Euclid Avenue will be closed to traffic from July 2, 2019 to Fall 2019 to allow for the construction of the box culvert under Euclid Avenue.

Restoration and Tree Planting will be included in the project.
Next Steps
